

# FuelQuest Zytax Compliance Solution

## KEY BENEFITS

- Reduces motor fuel compliance complexities
- Minimizes reporting risks from changing regulations
- Decreases cost and improves reporting efficiencies
- Consolidates multiple jurisdiction reporting requirements
- Streamlines data collection
- Simplifies reporting

Zytax compliance solutions, the most comprehensive applications available, provide the reporting capability for nearly 500 returns and 3,500 schedules.

The program is supported with timely tax rule and rate updates to ensure form, schedule and regulatory changes are captured and in place.

Our solution imports data from one or more systems, tracking all material movement transactions. Once tax transactions are scrubbed, validated and synchronized, electronic or signature-ready forms are created for all major reporting jurisdictions in the United States. All transactions are stored in a centralized tax data warehouse with strategically designed tools for querying and ad-hoc reporting.

## ABOUT FUELQUEST

FuelQuest, Inc. provides on-demand, web-based supply chain management and tax automation software and services for fuel suppliers, distributors and buyers in global downstream energy. Our Fuel Management System (FMS) automates all aspects of the fuel management process from procurement, inventory management, demand forecasting, strategic sourcing and financial reconciliation to margin analysis and environmental compliance monitoring. The FMS solution powers the largest fuel management network in North America. Zytax supplies strategic software automation solutions for indirect tax determination and excise motor fuels compliance for the energy industry.
